Useful information

Height adjustable underframes are designed and manufactured principally for use within office environments. Fabricated from 14 gauge laser cut mild steel sections.

Each leg frame incorporates a precision case hardened gearing mechanism, capable of exerting a lifting force of circa 800N (approx. 80kgs), and delivers 200mm of smooth stepless adjustment via a manual crank handle. As a rule of thumb this translates into a "safe working load" of 120kgs per desk, assuming the load is evenly distributed.
